

Environmental Impact Summary

Bare - “Less Is More”

Production Date: December 3, 2021

Striving for Zero:

This production implemented Zero Waste standards to prevent and divert waste on set. **Zero Waste is measured as 90% or greater diversion from landfill.** Thank you for your collaboration for a better behind-the-scenes.

MATERIALS DIVERTED

- Compost:** food waste, liquids, soiled paper
- Recycling:** paper, cardboard, plastics, metals, glass, snack wrappers
- Reusable materials:** salvaged set items
- Food Recovery:** food donations from breakfast and surplus catering meals

COMPOST

RECYCLING

EcoSet manages hard-to-recycle items

Snack packaging such as chip bags and bar wrappers were collected for recycling by **TerraCycle**. EcoSet collects plastic bags and clean film plastics to send to a local specialty recycler near Los Angeles that processes and pelletizes waste plastics for use in manufacturing new products.

Access to the Excess

Production and Art Department discards get a second life at **EcoSet's Materials Oasis reuse center**. Surplus Art Department materials, props, lighting expendables, foam core, wardrobe hangers and more were collected and donated from this project.

Environmental Impact Summary

COMPOSTING

243 LBS composted

Food waste, compostable products, soiled paper and liquids are collected on set and processed at an industrial composting site. This avoids methane emission in a landfill. Methane is a greenhouse gas that is more potent than CO₂.

RECYCLING

102 LBS recycled

Beverage containers, paper, cardboard and other recyclables are collected on set and processed at a Materials Recovery Facility. Recycling reduces the pollution caused by waste, and conserves natural resources and raw materials.

FOOD RECOVERY

45 LBS recirculated

Surplus breakfast and lunch food was collected on set and redistributed by nonprofit Every Day Action. This avoids additional methane emissions and reduces the overall carbon footprint of this project.

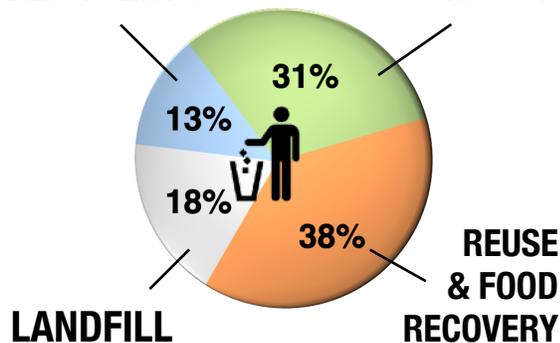

REUSE RECOVERY

256 LBS recirculated

Reusable materials and creative scraps are collected on set and turned into a free resource at EcoSet's Materials Oasis reuse center. This avoids sending useful production items to landfills, and benefits schools, nonprofits, theaters, filmmakers, artists and many others.

RECYCLING

COMPOST

82% DIVERSION

791 Waste generated LBS in 1 project day

646 Waste diverted from landfill LBS

Environmental Impact Summary

For surplus breakfast and lunch meal items, EcoSet partnered with Every Day Action, a 501(c)(3) nonprofit organization working to re-allocate the food waste on film sets directly to those living on the streets of Los Angeles, Long Beach, and the San Fernando Valley: youeverydayaction.org

Additional sustainable catering actions: vegan and vegetarian meals were available, and wooden disposable cutlery was used, which is 100% compostable.

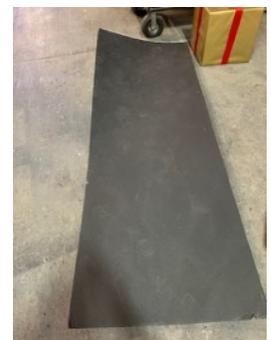

Future opportunity for waste prevention:

Aluminum canned drinking water and reusable water bottles used with refilling stations help to avoid single-use plastic water bottles on set.

Aluminum is infinitely recyclable and takes 90% less energy to manufacture an aluminum can from recycled metal versus new metal.

REUSABLE MATERIALS ARE GIVEN A SECOND LIFE BY ECOSET

Statement of Reuse

ecoset.la/redirect

With a plan in place, it's not waste.

By working with **EcoSet ReDirect** to responsibly manage your production surplus, your efforts will keep reusable materials out of landfills and provide resources to the local community. Thank you for choosing to **reduce your environmental impact through reuse and contributing to a circular economy.**

ITEMS DIVERTED	Straw, metal table legs, foam core, hangers, lighting gels, contact paper, paint, plant pot wood, wood shavings and more	LBS DIVERTED	256

UN Sustainable Development Goals

Your efforts align with the United Nations Sustainable Development Goals. Goal 12 is a commitment to ensure sustainable production and consumption patterns. sdgs.un.org/goals

Access to the Excess

At EcoSet's award winning Materials Oasis reuse center, we recirculate sets, scenic elements, set dressing, props, wardrobe, production supplies and reusable creative discards at no cost to non-profits, schools, filmmakers, theaters, artists and many others.

California Waste Diversion Targets

Your efforts align with the state of California's goal to divert 90% of waste from landfills by 2025. All California businesses are required to recycle in order to reduce greenhouse gas emissions. calrecycle.ca.gov

Los Angeles Green New Deal and RecyclA Zero Waste Program

Your efforts align with the City of Los Angeles' Green New Deal sustainable city plan. LA's Zero Waste program aims to divert 90% of waste from landfills by 2025 and 100% of waste by 2050. plan.lamayor.org / lacitysan.org

Thank you for supporting the local community, education and the arts!

ecoset.la/materials

Please note that EcoSet is not a 501(c)3 non-profit entity, so our diversion services are not tax deductible. As part of our sustainable business model, we donate new merchandise with a Fair Market Value such as products, wardrobe, furniture, home goods, children's items and school supplies to non-profits or schools. Used scenic and production materials are made available as a free resource to all groups and individuals in the local community.

Certified Women Owned Since 2011

EPA Food Recovery Challenge

EcoSet donates surplus food to non-profits under the protection of the Federal Good Samaritan Act, and tracks diversion through the EPA Food Recovery Challenge.

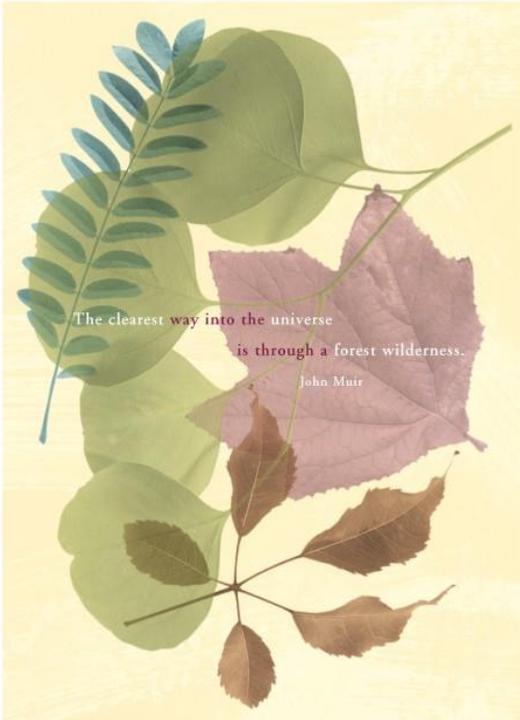

Los Angeles Production Carbon Offset Program

PROJECT TITLE: Bare - "Less is More"			
CLIENT	Bare / GS&P	DATE	12/3/21
PRODUCTION COMPANY	Tool of North America	# URBAN TREES PLANTED	5

EcoSet partners with TreePeople to plant a grove of urban trees to help offset the carbon footprint of a shoot.

A mature tree can absorb 48 pounds of carbon per year. Trees absorb carbon by using it to build their trunks, branches, roots and leaves.

*A grove of five trees
