

GLOW

EcoSet recirculated
19.4 TONS
of reusable materials from
the final wrap out of GLOW.

Set dressing, props, wardrobe and other released production items:

Furniture, home goods, decor, framed artwork, lighting fixtures, filing cabinets, fitness equipment, vintage clothing, shoes, bedding, fabric, production papers, packing materials and more.

Four full 24' box truck loads avoided five 40-yard dumpsters

It's just such a relief to know that EcoSet is there when liquidation phases arise in the television/film business. They were able to assess what they would be able to absorb themselves, and refer us to other reuse parties for the remainder. When they say they will take everything in a set dressing storage unit, that is what they mean. All over, an amazing service and a massive leap in the right direction for our industry in reducing its carbon footprint.

Liz Gaffney

Production Coordinator / GLOW

Home goods, pillows and blankets were donated to Kay's Foundation for redistribution to homeless individuals and families.

By using EcoSet to dispose of all of our leftover set dressing, all of these items will be reused instead of ending up in a landfill. It was a savings for our final wrap out as it was cheaper to pay for their trucks and labor than it would have been to have our storage facility dispose of all items. We saved on countless dumpsters as well as on labor, and reduced our environmental footprint all at the same time. Their staff was incredibly professional and efficient, and also took the time to find a home for some of our larger scenery for a very reasonable referral fee, again cutting down on waste and cost. I hope to be able to utilize them on all my future final wraps.

Djuna Myers

Production Supervisor / GLOW
