# Environmental Impact Summary

## COMPOSTING

**578** LBS composted

Food waste, soiled paper products and liquids are collected on set and processed at an industrial composting site. This avoids methane emission in a landfill. Methane is a greenhouse gas that is more potent than CO<sub>2</sub>.

## RECYCLING

**304** LBS recycled

Beverage containers, paper, cardboard and other recyclables are collected on set and processed at a Materials Recovery Facility. Recycling reduces the pollution caused by waste, and conserves natural resources and raw materials.

## REUSE RECOVERY

**315** LBS recirculated

Reusable materials and creative scraps are collected on set and turned into a free resource at EcoSet's Materials Oasis reuse center. This avoids sending useful production items to landfills, and benefits schools, nonprofits, theaters, filmmakers, artists and many others.
